Khánh Quốc

INTERN FULL-STACK DEV

CAREER OBJECTIVE

I am actively seeking an internship opportunity in Front-End or Back-End development to gain hands-on experience and enhance my technical skills, with the long-term goal of becoming a proficient Fullstack Developer. While I may not have extensive industry experience, I have built personal projects using modern technologies, and I am highly motivated, quick to learn, and dedicated to continuous growth. I thrive in collaborative environments, enjoy solving real-world problems through code, and am eager to contribute value while learning from experienced developers.

PERSONAL SKILLS

- **Proficient in English (TOEIC score: 825/990).**
- Able to research and comprehend technical documentation in English.
- **Strong logical thinking and solid understanding of JavaScript fundamentals.**
- Quick to adapt to new programming tools, libraries, and technologies.
- **Skilled in leveraging AI tools to support coding tasks (e.g., GPT, GitHub Copilot).**
- Time management and planning skills.

WORK EXPERIENCES

Intern Frontend developer.

Software Development Department – HCM University of Technology & Education Aug 2024- Dec 2024 (4 months)

- Learned about modular architecture and gained hands-on experience with **TypeScript and Angular.**
- Participated in the development of a childcare management website, focusing on admin modules.
- Completed assigned tasks with a proactive attitude.
- Built reusable modules and made significant contributions to the overall system design.

PROJECTS

Movie stream website - Personal project
Personal Project (In Progress) – From March 2025 to Present

Demo:

https://movie-website-frontend-two.vercel.app

- Conducted in-depth research on technologies such as NestJS, NextJS, and PostgreSQL.
- Integrated multiple libraries and technologies, including TypeScript (for type safety), Passport (authentication), Cloudinary (media storage), TypeORM (ORM), Redis (caching), Tailwind CSS (styling), and Zustand (state management).
- Currently developing a movie streaming website (MovieStream) as a full-stack web application.
- This project is intended to serve as a comprehensive capstone project with promising future update.

Github:

Car Parts E-commerce Website – Personal Project
August 2024 – December 2024

Demo: https://car-accessories-eccomerce.vercel.app

- Developed a car parts e-commerce website as a hands-on project.
- Integrated key technologies including ExpressJS for the backend, and ReactJS, Tailwind CSS, Redux for the frontend.
- Gained familiarity with business logic and successfully built a relatively complete and functional website.
